### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Eugene Perez on January 12, 2012.

The application has been amended as follows:

- (1) Claim 6, in line 1, first word, delete "A" and insert "The".

- (17) Claim 24, in line 2, delete "polyurethane-series" and insert "polyurethane".

Art Unit: 1787

2. It is noted that claims 22-24, previously withdrawn from consideration under 37 CFR 1.142 have been rejoined.

### ***Terminal Disclaimer***

3. The terminal disclaimer filed on 11/28/2011 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US 7,534,494 has been reviewed and is accepted. The terminal disclaimer has been recorded.

### ***Reasons for Allowance***

4. The following is an examiner's statement of reasons for allowance:

5. Wakita et al. (US 7,534,494) discloses a composite body as presently claimed. Applicant filed a Terminal Disclaimer on 11/28/2011 to overcome the non-statutory double patenting rejection. Applicant's submission successfully overcomes the rejection.

6. Wakita et al. (WO 2004/050363) discloses a composite comprising a polyamide resin member directly bonded to a polyurethane resin member, wherein the resins meet the requirements of the present claims. To overcome the 102(a) rejection over Wakita, Applicant has perfected foreign priority to JP 2003-345297, JP 2003-358542, and JP 2003-361801 by providing translations of said JP applications under oath. The present claims appear to have support in the submitted translations. Therefore, Applicant has successfully overcome the 102(a) rejection over Wakita.

7. Ikuta et al. (US 2003/0118839) discloses a composite comprising a thermoplastic resin part bonded to a rubber part [0001]. The thermoplastic part comprises polyamide, including alicyclic polyamides [0036, 0040]. The polyamide has terminal amino groups [0044]. Ikuta also teaches the use of a vulcanization auxiliary, including polyamide oligomers with molecular weights up to 1000 [0108]. The rubber part comprises urethane-based rubbers, including polyester urethane elastomers and polyether urethane elastomers [0081, 0086]. Ikuta is silent with regard to the terminal amino group concentration of

Art Unit: 1787

the polyamide resin. Ikuta is silent with regard to the presently claimed molecular weight of the polyamide oligomer.

8. Applicant has successfully argued that the rubber part of Ikuta must be vulcanized at the time of bonding with the thermoplastic resin part (see p9-11 of Remarks filed 8/10/2011). As the rubber is vulcanized, it is not "thermoplastic" as required by the present claims. Applicant's amendment to recite "bonded" further requires a substantial connection between the two parts, rather than the broader term of "joined" as previously recited. Note that Ikuta discloses "bonding the resin member to the unvulcanized rubber member" by treating a surface of the thermoplastic resin member with a solvent and further contacting the surface with the unvulcanized rubber member at paragraph [0144], but this refers only to a pre-treatment that precedes vulcanization of the rubber part to create the secure bond between the parts. That is, it cannot be reasonably said that Ikuta provides a method of bonding an unvulcanized rubber to a thermoplastic resin; to create a firm bond requires vulcanization of the rubber part.

9. Claims 1, 6-14, and 19 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 22-24, directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on 4/3/2009 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Art Unit: 1787

10. Given that claim 22 includes all the limitations of allowable product claim 1, it is noted that present claims 22-24 are allowable over the prior art for the same reasons set forth above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JOHN FREEMAN whose telephone number is (571)270-3469. The examiner can normally be reached on Monday-Friday 9:00-6:00PM EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Callie Shosho can be reached on (571)272-1123. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
